Abstract

5 The present invention relates to a pulverulent formaldehyde-free binder composition containing

a) a pulverulent copolymer polymerized from maleic anhydride and at least one α -olefin, optionally styrene; and also

10

b) at least one pulverulent crosslinker; and also

c) optionally further additive materials.

15 The present invention further relates to a process for binding fibrous and/or granular substrates by means of the binder composition of the present invention and also to the shaped articles obtainable therefrom.
